

A number line is another way to
solve story problems.

Count on—start with the 1 g nt ^ "

Number Bond Dashes will be done in order to provide fluency when decomposing numbers.

Break the total into parts. Write a number bond and addition and subtraction number sentence to match the story.

Charlie caught 8 fish at the end of the day. He caught 3 in the morning. How many fish did he catch in the afternoon?

Roll single digit numbers and add them together. • Roll 2-digit or 3-digit numbers and add them together. • Add all the digits of your house number

Add the price of two items at a store. • Compare gas prices to find the lowest amount. • Start with 20 counters (beans, pennies, etc.) and roll two dice to make a 2-digit number. Subtract counters until you get to 0. • Give your student an addition or subtraction number

sentence and ask them to make up a story problem to go with the number sentence. • Make a physical array with counters and record on paper using symbols.

number sentence

During the first 10 days of schools, teachers will emphasize the importance of the 8 Standards for mathematical practice through 30 minute lessons.

These practices will be embedded in lessons daily throughout the school year.
